On Oct. 3rd 2003, General Secretary of CPC and President of PRC, Mr.Hu Jintao, visited SANY industrial city. He highly appraised SANY for its achievements and looked forward to SANY's better tomorrow. Before his leaving, Mr.Hu shook hands with the chairman of SANY GROUP, Mr.Liang Wengen cordially expressed his best wishes, "You have already achieved a magnificent past, wish you work shoulder to shoulder and make a better future!"

On August 13th 2005, Politbureau member of CPC and Prime Minister of PRC, Mr.Wen Jiabao, visited SANY and encouraged SANY people: "To build SANY well and build it to be a world-class enterprise."

On April 2nd, 2008, Governor Sonny Perdue, the State of Georgia, and other eight US officials visited SANY facility in Beijing, China. During the visit, Governor Perdue operated an SR220C Rotary Drill Rig. He was excited about the performance of the equipment, the future of SANY America.

Representative of eighth, ninth, and tenth National People's Congress Committee

OPERATION

I am in a habit of enjoying the sunrise and sunset. I am moved both by the splendor of sunrise and by the resplendence of sunset. On occasion, a kind of indescribable pressure surges in my mind. Just under such a pressure, SANY and I feel a driving force which seems to be never exhausted arises spontaneously. This driving force originates from the faith of tenaciously cultivating an "Experimental Field" for Chinese Industry, and from the belief of shaping SANY into a famous brand worldwide.

Undertaking an enterprise is a bold and generous conduct. Right now, SANY's products and brand are esteemed as the symbol of high quality by customers. With the trends of global economy integration, SANY and I perceive the historical mission more profoundly. When we draw attention to the gap between SANY and the top enterprises in the world, we are on the anxious bench. Our attic faith is: reconstructing the mechanical equipment industry with advanced technology to upgrade our products to the world class level; providing customers with continuously innovated products and incomparable quality services to meet their requirements as maximum as we can.

Human being becomes great for his dreams and life is full of meaningfulness for his dreams too. SANY is realizing its dreams step by step.

Introduction

SANY Group was established in 1989. It was created with the tenet of "Building the First Class Enterprise, Shaping the First Class Talent, Making the First Class Contribution". The main business of SANY Group covers concrete machinery, road machinery, earthmoving machinery, crane machinery, drill machinery, coal mining machinery, trenchless machinery, and other engineering equipments.

SANY headquarters in Changsha National Economic and Technical Development Zone, Hunan Province China, with five industrial parks in Changsha, Beijing, Shanghai, Kunshan, Shenyang of China, and three other industrial parks in USA, Germany and India to provide R&D, manufacturing, marketing, sales and services to customers. SANY's products have been sold to customers around the world with the establishment of sales offices/companies in most of the

countries. The annual sales revenue of SANY Group is over 2.5 billion US Dollars. In China SANY has the overwhelming market share of concrete boom pump, trailer pump, crawler crane and drill rig, with the fastest growth in truck crane, excavator, reach stacker, asphalt mixing plant and concrete mixing plant.

SANY has won the honor of National Science and Technology Advancement Prize in China. SANY has been well recognized as one of the most famous brand in China, and "the Most Valuable Brand of China" by the World Brand Lab.

Culture

Mission

First Class Enterprise, First Class Talent, First Class Contribution.

Core Value

Quality Changes the World.

Enterprise Ethics

To be Fair and Honest with Customers.

Business Principle

All for Customers and All from Innovation.

Spirit

Make every effort unremittingly to help Customers, Employees and the Communities to become Successful.

Work Style

Work Efficiently and Quickly and Pursue Excellence.

Beliefs

Human being becomes great for his dreams.

Money only has the allurements, but the entrepreneurship unites employees.

Anyone has the right to give his opinions freely and straightforward.

Make allowance for mistake first time, but not for the repeated mistakes.

No achievement is regarded as regret; Innovation is recognized as premium.

Try our best to achieve the mission, and self-fulfill our own value on the platform of SANY.

Networking

SANY GROUP Marketing Network

**SANY Group Headquarter,
SANY Heavy Industry Co., Ltd.
Changsha, China**

Located in Changsha National Economic and Technical Development Zone, It covers 18.8million sq.ft. (1.75million m²).
For products: Concrete Boom Pump, Trailer Pump, Motor Grader, Reach Stacker, Truck Crane, Asphalt Paver, Roller, Concrete Mixing Plant, etc.

Shanghai Industrial Park

Located in Chuansha Economic Park of Shanghai Pudong District, This facility covers over 2,100,000sq.ft. (200,000m²) of space. This is the R&D center and manufacturing base for Hydraulic Crawler Crane.

Shenyang Industrial Park

Located in Shenyang Economic and Technology Development Zone, Liaoning Province, China. This facility covers over 2,400,000 sq.ft. (220,000m²) of space. This is the R&D center and manufacturing facility for Coal Mining Machinery.

Beijing Industrial Park

Located in Beijing Zhongguancun, China, the Science and Technology Park, covering over 1,700,000sq.ft. (160,000m²) of space. This is the R&D center and manufacturing facility for Rotary Drilling Equipments.

Kunshan Industrial Park

Located in Economic and Technology Park, Kunshan, Suzhou, Jiangsu Province. This facility covers 7,800,000sq.ft. (731,400m²). This is the R&D center and manufacturing facility for Hydraulic Excavator.

Achievements

1994

SANY successfully developed the first Trailer-Mounted Concrete Pump that ended the history of China's total dependence on imported trailer pump equipment.

1998

SANY successfully developed the first 121.4ft (37m) Truck-Mounted Concrete Pump at Changsha Industrial Park.

1998

In China's ShenZhen Seg Plaza, SANY Trailer-Mounted Concrete Pumps set the first world record in vertical concrete pumping capacity to a height of 987ft (300.8m) which labeled SANY as the "Concrete Pump King."

2000

SANY introduced to the world the first fully Hydraulic Motor Grader changing the direction of motor grader technology for the world market.

2003

SANY introduced their first Asphalt Paving Machine to the market, presenting a brand new road construction technology in China.

2003

SANY successfully developed the 184ft (56m) Truck-Mounted Concrete Pump, the only manufacturer having the ability to exceed a 164.1ft (50m) truck-mounted concrete pump in Asia.

2004

SANY developed the grade-three concrete pump, re-defining a new construction concept and advanced construction technology.

2004

SANY developed a 60-ton horizontal directional drilling machine in Beijing China, which is the largest in Asia.

2005

SANY introduced the Road Milling Machine presenting a brand-new road construction technology in China.

2005

SANY successfully entered the harbor machinery market with the advanced RSC45-5M Container Reach Stacker Machine.

2007

SANY's Bitumen-Cement Mortar Semitrailer appeared at the jobsite in Beijing-Tianjin, China's high-speed railway project, ending the history of using foreign machinery on bitumen cement perfusion high speed railway projects.

2007

In China's Shanghai Global Financial Center, SANY's Trailer-Mounted Concrete Pump broke the world record in vertical concrete pumping capacity. A record height of 1,614.2ft (492m) was reached.

2007

SANY's 217ft (66m) Truck-Mounted Concrete Pump, with the longest boom in the world and 15 core technologies came into production, setting the new Guinness World Record.

2008

The first large tonnage fully Hydraulic Rotary Drilling Machine in Asia, SR360, appeared, listing the SANY Group among the world class rotary drilling equipment manufacturers.

2008

SANY's SCC10000, with 1000 metric ton Capacity Launched at Bauma Show Shanghai as the "Crane King Asia".

2008

SANY SY2000 is the first 200 metric ton Excavator launched at Bauma Show Shanghai, list SANY one of the top 5 manufacturers over 200 ton capacity in the world.

Positioning of SANY America

A world-class R&D platform to upgrade all products of SANY Group

A lean manufacturing base incorporating competitive advantages both from China and America

A marketing & Sales and service center for products to be sold to North America and South America.

An internationalization springboard of SANY Group

Objective:

To build SANY America as a platform for research and development, product manufacturing, sales, technical support and future investment for SANY products.

Research and Development Goals:

To continually improve SANY America products through innovative engineering technologies, continuing research and product support.

Marketing Goal:

To meet or exceed the network of marketing in North America for the first five years with a sales goal of 500 million dollars. To continually support SANY America produced products through a network of product support teams, parts distribution and advanced continuing training on SANY products.

Product Support:

To establish a North American based service and parts distribution network in Georgia that will support all SANY America produced products.

Industrial Park, USA

Located in Peachtree City, Georgia, covering 272 acres of land is the SANY America's Headquarter, R&D center and manufacturing facility.

As one of the overseas subsidiaries of SANY Heavy Industry Co., Ltd., SANY America Inc was founded in 2006 with headquarter locating in Peachtree City, Georgia. SANY America is focusing on R&D, manufacturing, marketing and sales, service and support of SANY products in North America and South America.

In September 2007, SANY signed an investment agreement with the state of Georgia to invest 60 million with the acquisition of 272 acres of land, to establish SANY America's headquarter and manufacturing plant for Concrete Boom Pump, Excavator, Motor Grader and Crane.

SANY America will operate this assembly facility under the laws and regulations of USA. With the integration of competitive advantages of super R&D capacity in USA and

fabrication cost advantage in China, SANY America will provide customers with superior products and incomparable service. SANY America always put the customers and employees first, and will do its best to ensure that customers are satisfied with the products and services, employees will grow and succeed with SANY's achievements. Based on this strategy, SANY will successfully shift the image from "Made in China" to "Created in China".

SANY in America

On September 12th of 2007 SANY Heavy Industry Co., Ltd. signed an investment agreement with the state of Georgia to invest 60 million dollars to establish a

manufacturing plant in Peachtree City. All SANY America products and support will service the United States, Canada, Mexico and South American markets.

Within five years SANY America's production capacity will reach 500 million dollars.

In January, 2008 ten machines including 217ft (66m) Truck-Mounted Concrete Pump, with the longest boom in the world, were brought to the 2008 World of Concrete Exposition in Las Vegas. A press release was also held to show our high quality research and development results, and to share our scientific and technological achievements with the world.

During the 2008 World of Concrete Exposition in Las Vegas, nearly one hundred people including the Phoenix News Media, and the SANY customers took part in a job site demonstration where a 217ft (66m) SANY Truck-Mounted Concrete Pump in West Manhattan was used to demonstrate the excellent performance of the SANY pumping system. This demonstration gained the respect from the construction industry professionals.

In March, 2008 SANY brought in 18 machines including the SANY (66m) 217ft Truck-Mounted Concrete Pump (the longest pump boom in the world) to CONEXPO-CON/AGG 2008, Las Vegas. In an area of

32,262 square feet of display SANY demonstrated that quality and globalization strategies will change the construction world. The performance of SANY's product gained the respect from the leaders of the

exhibition, the industries competition, and the construction industry.

Truck-mounted Concrete Pump at the construction site in the Mexican Torreon Coah Complex.

Highway construction project.

This new highway will connect the state of Arkansas and Louisiana. Costing over 100 million dollars, this project has been under construction since 2006 and is projected to be completed by the end of 2008. The 217ft (66m) SANY Truck-Mounted Concrete Pump is used on the job and the owner of the company is very impressed with the machine's performance.

SANY Truck-mounted concrete pump

Truck-Mounted Concrete Pump 121ft (37m) undertook the concrete placing task in an electric power plant in the state of Arkansas. The user was very satisfied with the performance and superior service support by SANY.

Hydraulic Excavator SY210/SY310

Construction Project: Arkansas Interstate Highway system.

With total investments exceeding 100 Million Dollars, this new interstate highway system project will connect the states of Arkansas and Louisiana. The project has been under construction for two and a half years and is scheduled to be finished by the end of 2008. Five excavators and one motor grader supplied by SANY are undertaking the job and have achieved a level of high satisfaction from its customers due to the superior performance of the machine.

SANY PQ190 Motor Grader

1,200 working hours in the interstate highway project in Texarkana, Arkansas.

SANY Hydraulic Crawler Crane

An SCC2500 Hydraulic Crawler Crane is on the job in Columbia City, Missouri.

SANY in Europe

One of the first SANY HG32C Hydraulic Crawler Cranes was used to keep a ship steady during a refloating operation after it ran aground off Blackpool on England's Irish

Sea Coast. A 50-ton SANY SCC500D Hydraulic Crawler Crane was used to remove and redistribute cargo on the deck so the ship could be refloated safely.

Two SANY HBT80C1818DIII Trailer-Mounted Concrete Pumps were used in the construction of Moscow's Federal Skyscraper. This will be the highest structure in Europe made totally of steel and concrete.

SANY in South America

Sabaneta Housing Project

In the city of Sabaneta, Columbia, SANY equipment was used to build a massive housing project. Seven buildings were constructed. SANY participation on this project includes three SY210C Hydraulic Excavators, two PQ190IIA Motor Graders, a 197ft (60m) Truck-Mounted Concrete Pump and a HZS60 Batching Plant. The contractor GRUPO MONARCA commented, "The SANY equipment we used on this job performed excellently. SANY has earned our next equipment purchase." In the near future, the contractor plans to build the highest building in Columbia 919ft (280m) using SANY equipment.

Ventenas Chile's 240 megawatt Power Plant Project

SANY equipment was on the job in the construction of a 240 megawatt power plant project. In use was a SY5296TBH-37M SANY Truck-Mounted Concrete Pump continuously pumping 81,223.7yd³ (2,300

m³) of concrete. The concrete grade is 40(C50), intensity of segregation 10cm. After using the SY5296TBH-37M Truck-Mounted Concrete Pump, Salfa Corporation commented: "Compared to other concrete

pumping equipment, SANY's equipment is more efficient, more reliable and is easier to operate and maintain."

Venezuela Housing Project

Starting in June of 2005 the Venezuelan government invested three billion US dollars to build over a million homes in five years. To head the project, Iran Kayson Company was hired to start the first phase

of the construction process. Before 2008, 200,000 houses will be built for the Venezuela government for low-income families. Kayson Company Venezuela C.A. gave our SY5311THB-37 Concrete

Truck Pumps an impressive performance review. Just as impressive was the service and support provided by SANY.
