Sustainable Development of Our Community

Haibo Guo, Ph.D.
ACSE Acting President and President Elected
October 12, 2008

Dear distinguished guests, our speakers, ACSE members, Ladies and Gentlemen,

First I would like to welcome everyone to the ACSE's 16th annual conference. Thanks to our honored guests and great speakers. Your attendance and contribution will make this conference a great success.

Motivated by spiraling fuel cost, growing concerns about ozone, and surging consumer demand for green products, the Association of Chinese-American Scientists and Engineers is hosting its conference to discuss the opportunity, responsibility as well as challenge in developing sustainable resources and to build eco-friendly communities. Organic product, sustainable agriculture, recycling, reducing carbon emission, and conservation of energy resonate with public who care about their healthy green living, and impact on environment and nature resources. 2008 Beijing Olympic projects have employed many energy conservation technologies ranging from electric vehicle, solar power, to rain water reutilization. The 29th Olympic was applauded as a green Olympic.

Let me also take this opportunity to express my great gratitude to the ACSE leaders (past and present), volunteers and all our members. It is your dedication and contribution that made this organization one of the largest, influential Chinese-American communities across the States. There are many, many unknown heroes, dedicated volunteers who sacrifice their family time and devote their greatest effort to help out ACSE. These are valuable assets of ACSE. Rather than mentioning few names with limited time and space, I decided not to list any. But my sincere thanks go to everyone who volunteered. It is your dedication that makes ACSE successful.

Looking back for the past year, ACSE has achieved its principal goal in building the exchange platforms for Chinese and American for all levels, from state, enterprise to individuals. ACSE hosted two government delegations from Shanxi province government, Shanghai GuoQiaoBan led by Zhou Hong and Jiangsu Province Science and Technology Division led by Yang Yu. The Shanxi State delegation was led by the deputy vice governor, Zhao Zhengyong. This is the visit followed by the ACSE's visit to Shanxi province in order to further strength the corporation between ACSE and Shanxi province.

Nine industrial business leaders from Wuxi city, Jiangsu province, just visited Chicago three weeks ago. This group consists of Liu Yuhai, CEO of Wuxi Industrial Development Groups, and Du Yi, General Manager of Wuxi BeiChuang Science and Technology Innovation Park. ACSE hosted a business discussion forum with Wuxi delegation. There were about 40 ACSE members attended the forum. During the meeting, ACSE and Wuxi Beichuang Park has signed a general corporation agreement. ACSE will provide a communication and exchange platform for Wuxi to promote their products, and to bridge Wuxi with American companies. With ACSE's introduction, Wuxi delegation also met with industrial companies for face to face direct talks. Corporation with Wuxi is a starting point, and ACSE is engaging with many similar entities.

Sustainable Development of Our Community, cont'

ASCE has its delegation to visit China and met with number of government and industrial leaders. Our goal is to promote exchange and corporation. ACSE was invited as the overseas scholars to tour in China, and met with the Chinese Youth Leader, Secretary He Junke. During the Zhongguancun technology park's visit, ACSE connected once again with the Beijing city top leader Zhu Shanlu and the park General Manager Xia Yingqi. The annual Guanzhou Exchange Forum has attracted ACSE for years, and we had our presence this year as well. Another big event ACSE attended is the gathering of three States in the Changjiang triangle development zone.

ACSE has made a concrete steps in corporation with local companies and business. ACSE has developed relationship to work with our key sponsors, such as Motorola, Prudential and BP. ACSE will continue to bring potential business delegations and governmental delegations to our sponsors for a direct communication and exchange.

ACSE's traditional and cultural activities attract many members. They provide the opportunities for culture inheritance and networking. ACSE has reached out to Alumni associations. We teamed up with them to host the Chinese New Year party and the summer picnic. There were nearly 300 attended the Chinese Spring Festival Dinner and more than 700 the summer picnic. The summer picnic event is one of the largest in the greater Chicago area with many sponsors, including Motorola. Another big event organized by ACSE is the NBA game going in Milwaukee, WI. Two NBA stars, Yao Ming and Yi Jianlian both from China, will meet the first time ever to play against each other. Many ACSE members are super fans of Yao and Yi, and this is the historical game that they do not want to miss. About 300 fans went to the game, and the Chinese Central Television (CCTV) interviewed ACSE.

Nature holds the greatest power, but sometimes it is devastating. There were two big natural disasters hit China in 2008. The southern freezing rain and snow storm came in the time millions of Chinese were on their way home to celebrate the traditional Chinese New Year. Trains were blocked in the middle of nowhere, and power lines were collapsed. ACSE members stand up and donated money (\$1128.00) to help people to get home for their traditional holiday gathering. In May 21, a powerful earthquake waked up the world. Thousands of lives were buried and thousands of homes were destroyed. Road was broken, power was out and communication system was down. In these disastrous situations, ACSE members showed a great humanity. Quickly over \$24,000.00 was donated from all members. ACSE is part of the greater Chicago communities to establish one middle school to be name “四川彭州芝加哥侨爱中学” and one primary school to be named “四川青洲芝加哥侨爱小学” in Sichuan.

ACSE has always helped our members to enhance their skills in career development, leadership and even finding a job. Our career development seminar has attracted more than 200 members. Both Motorola and Prudential had their teams to discuss the career development, diversity and opportunity. Career enhancement and leadership development are ACSE's continuing education topics to benefit our members. During our conference today, the Motorola leaders will bring us great educational and convincing presentations and discussions about this topic. I am looking forward for that.

ASCE has grown tremendously during the last few months. The Society of Environmental Scholars and Professionals has jointed ACSE as ACSE Environmental Society. It brings more than 1000 members. On behalf of ACSE, I welcome our Environmental Society.

Sustainable Development of Our Community, cont'

Looking forward into the coming year, ACSE will strength its position in building platforms for technology and culture exchanges. With our bilateral connections, ACSE continues to work with current partners in the US and China, and reach out to new potential companies. ACSE will bring the Chinese enterprises to the United States and talk to each other directly. This will benefit companies and people in both countries.

For our members, ACSE continues its effort to provide educational and informational seminars and discussions. The cultural and traditional activities have given our members the opportunities to meet with old friends and make new friends, and to remind us the unique cultural history. Our members will be informed first with any opportunities such as business and job openings.

2008 is an election year. Americans will make their decisions about their future this year. We are Americans and we are Chinese Americans. Many of us express great concerns about the family value and education. It will be your choice and your responsibility to exercise your right. I am taking this opportunity to urge all our eligible members to cast your vote on November 4.

Everyone feels the pain at gas pumps. The crisis of destabilized climate change and rising competition for energy could poison our world of living. ACSE, as a community, has to play a role in social responsibility and sustainable green effort. Green is a big word with many areas covered. Many of our members are in the frontier of inventing and developing new energy sources and new technologies. Two of our keynote speakers will discuss the latest issues and inventions in the areas of energy and emission. But you do not have to be in those technical fields to be green. You may practice green and save our world by using energy efficient fluorescent bulbs in your home, reducing and recycling, and car pooling. You may also participate the earth day activities locally in your town or village. As our world becomes sustainable and environment friendly, it is not hard for us to live for 100 years, as you will hear from one of our afternoon session speaker.

Thank you and enjoy rest of the conference.

欣闻贵会举行以“绿色奥运与绿色资源的可持续发展”为主题的2008年会，特此表示祝贺！发展绿色能源代表着世界能源生产与消费的新趋势，对于减少环境污染、保护自然资源、应对全球气候变化、实现人类社会的可持续发展将发挥巨大的作用。贵会选择“绿色资源”作为今年年会的主题，意义重大。

中国能源生产与消费总量巨大。2006年，中国一次能源生产总量为22.1亿吨标准煤，列世界第二位。其中，原煤产量23.7亿吨，列世界第一位；原油产量1.85亿吨，列世界第五位；天然气产量586亿立方米；电力装机容量和发电量分别达到6.22亿千瓦和2.87万亿千瓦时，均列世界第二位。2006年，中国一次能源消费总量为24.6亿吨标准煤，其中煤炭的比重高达69.4%，而可再生能源和核电比重只有7.2%。今后若干年，中国的能源生产与需求将继续保持强劲的增长势头。

绿色能源的发展在中国方兴未艾。发展绿色能源能够缓解中国工业化进程中的能源紧张和环境问题，降低中国对矿物燃料尤其是石油的需求，进一步提高中国的能源安全。中国政府发布的《可再生能源中长期发展规划》提出，中国到2010年和2020年将使可再生能源消费量分别达到能源消费总量的10%和15%。2007年中国的绿色能源项目投资达60亿英镑，居全球第二，仅略低于全球投资最高的德国。今年中国宣布对绿色能源的投入将在去年的基础上再增加一倍。预计今后二三十年，中国每年可供开发利用的绿色能源可达8亿吨标准煤。因此可以预料，绿色能源相关的技术、设备和项目在中国将有着广泛的需求和广阔的市场。

贵会是旅美各领域科技专业人士组成的重要团体，多年来奉行“合作、发展、贡献”的创会宗旨，关心祖国发展，充分发挥自身优势，在推动中美科技、文化交流和友好合作方面发挥了积极而重要的作用。

最后，预祝年会圆满成功！

UNITED STATES SECRETARY OF LABOR ELAINE L. CHAO

October 12, 2008

Greetings to all gathered with the Association of Chinese-American Scientists and Engineers!

As you celebrate the 16th Annual Conference, Asian Pacific Americans can take pride in the many contributions our community has made to our nation. President George W. Bush and I are deeply committed to ensuring that Asian Pacific Americans continue to have access to opportunities in mainstream America. President Bush has appointed more than 400 Asian Pacific American leaders to the highest levels of government, including two Asian Pacific Americans to serve in his Cabinet at the start of his Administration, a first in our country's history.

Helping Asian Pacific Americans reach their full potential has been a priority throughout my tenure. The Department has instituted many initiatives to help the Asian Pacific American community access greater opportunities in mainstream America. In 2003, for the first time in our nation's history, the Department of Labor began to highlight the employment data on workers of Asian descent. As part of the Department's outreach, significant contributions have been made to the advancement of Asian Pacific Americans through partnerships, targeted compliance assistance, and enhanced enforcement of labor laws, especially those protecting vulnerable immigrants.

As America transitions to a knowledge-based economy, many new jobs created will require higher skills and more education. We will need workers in many industries including healthcare, nanotechnology, biotechnology, geospatial technology, information technology, and advanced manufacturing. For example, in the next decade the U.S. will need over 900,000 engineers, including aerospace, biomedical, civil, computer software, and environmental engineers. These trends represent a promising opportunity for the Asian Pacific American community, which places tremendous value on education.

As our nation grows and becomes more diverse, we can all play an integral role in building bridges of understanding between our two cultures. Looking ahead, Asian Pacific Americans are uniquely positioned to continue to contribute even more to our country.

Best wishes for a successful conference!

Sincerely,

OFFICE OF THE GOVERNOR

Dr. Nancy Ho
One of the Sixty World's Greatest Minds

Dr. Nancy Ho is currently a research professor in the School of Chemical Engineering at Purdue University. She received her Ph.D. degree from the Department of Biological Sciences in Purdue University. She then joined the same university as a scientist in DNA research fields. In 1980, she was invited to join the Laboratory of Renewable Resources Engineer (LORRE) to establish its Molecular Genetics Group. Since then, Dr. Ho has focused her efforts on using recombinant DNA techniques to improve industrial microorganisms. Her most well known work is the development of recombinant yeast that can effectively produce ethanol from all types of cellulosic plant materials – such as corn stalks, wheat straws, wood, and grasses. So far, one company has successfully produced ethanol in large quantity from wheat straw using her Ho-Purdue yeast since 2004. Quite a few other companies are in the process of producing ethanol from various types of cellulosic biomass using the same yeast.

Dr. Ho has received numerous honors for her development of the cellulosic ethanol-producing yeast. Those include the R&D 100 award in 1998, the Discover Magazine award in 2000. She was also named by Indiana Senator Lugar as his September 2006 Energy Patriot, and recognized by the President of the United States, Mr. George Bush who invited her as one of his guests attending the State of the Union Address on January 23, 2007. Recently, Dr. Ho was among the 60 of the world's leading scientists, writers, artists, business and civic leaders whose essay were published in a new book edited by veteran TV journalist Mike Wallace – “The Way Will be 50 Years from Today: 60 of the World's Greatest Minds Share Their Visions of the Next Half-Century”.

Dr. Ho is not only a top scientist, but also an excellent entrepreneur. She believes that she can contribute more to the growth of cellulosic ethanol industry in this country and around the world by establishing a unique company. As such she founded Green Tech America, Inc. (www.greentechamerica.com) in 2006 to facilitate cellulosic ethanol production throughout the world.

赈济雪灾情系同胞

-----科工专与八大校友会欢庆春节

刘佳塔林图雅

新年伊始，万象更新。当地时间**2008年2月16日18时**，旅美科学家工程师专业人士协会会员携家人和芝加哥八大校友会的校友们（北京大学，清华大学，中国科技大学，复旦大学、浙江大学，武汉大学，南京大学和华中科技大学），在芝加哥郊区欢聚一堂，共庆鼠年佳节。

此次宴会是由科工专副会长徐向东和公共关系委员会的王健女士主持。中国驻芝加哥总领馆黄屏总领事应邀参加。科工专会长陈奎博士首先代表科工专向全体到会嘉宾恭贺新春！他说：科工专和八大校友会集中了来自中国最高学府，最精尖的优秀人才，并以其团结奉献发展的理念，在中美两国取得了广泛的赞誉。

在喜气洋洋的气氛中，科工专副会长梁琨女士将大家的思绪引到那场席卷半个中国，五十年不遇突如其来的雪灾之中。她动情的说，雪灾使南方的亲人同胞生产生活遭遇了严峻的考验，经济蒙受了巨大的损失，我们这些海外游子，当亲人有困之时，应尽一份绵薄之力，奉献一片爱心，送上一份温情，帮其共度难关。为此，她和科工专所有工作人员共同发出：“抗雪救灾情系同胞”募捐的呼吁！将晚会推向了高潮。一方有难八方支援！赈济雪灾，心系亲人同胞。最后，陈奎博士把这凝聚着科工专成员一片爱心的**1128**美元善款交到了黄屏总领事的手中，会场爆发出热烈的掌声。

此时，中国驻芝加哥总领馆黄屏总领事说：“今年的晚会与以往不同，南方的大雪牵动着牵动着亿万人民的心，更牵动着海外游子的心。大家伸出援手，献出爱心，我替灾区人民谢谢大家，赤子之情，爱心溶雪！祝福科工专和八大校友会不断发展壮大，扬名海内外，为中美两国的友好合作，促进中美两国的科技文化交流而共同努力！”

中國雙龍會密城華人球迷齊助陣

●王堅

體育是人類的共同語言，體育將世界各地的人們聯系在一起，體育也是溝通中國和美國的重要橋梁。想當年，小小銀球傳友誼，乒乓運動幫助兩國建交；看今朝，中國雙龍展英姿，籃球比賽加深中美交流。姚明和易建聯先後加入美國**NBA**後，在美國掀起中國熱，在中國掀起籃球熱，美國華人更是為姚明和易建聯而感到驕傲。

在**2008**年春節即將來臨之際，姚明的火箭隊和易建聯的雄鹿隊在密爾沃基市的籃球大賽給華人球迷送上一份春節大禮。科工專積極地組織芝加哥華人球迷赴密城觀戰，科工專新聞通訊委員會主任王雪飄，不辭辛苦地聯系北大、清華、復旦、浙大、南大、科大等校友會和各主要大學中國學生會，組織了**300**多名球迷于**2月2日**赴密爾沃基市觀戰，為姚明和易建聯吶喊助威。大家穿著信通公司贊助的有“姚”和“易”字樣的體恤衫，挂起科工專橫幅，揮舞國旗和科工專會旗，一起高呼“聯聯進球，姚姚領先”，現場氣氛十分熱烈激昂。姚明和易建聯將要在奧運會期間在中國籃球隊中並肩奮戰，科工專和其他社團的球迷也？中國奧運健兒加油鼓勁。比賽緊張激烈，雄鹿隊幾度領先，最後火箭隊以**91比83**獲勝。易建聯加入密城雄鹿隊後，密城的阿聯球迷俱樂部等華人社團加強和主流社會的聯系，並創辦了《密城時報》，積極傳播中國文化。中國文化在密城日益走入主流社會，此次為迎接雄鹿隊和火箭隊比賽，球場中洋溢著濃厚的春節氣氛，入口挂著“新年快樂”的中文條幅，中文學校的學生們在球場入口處的大廳裏跳起歡樂的中國舞蹈。科工專會長陳奎博士在接受中央體育電視台採訪時，也向電視機前的幾億中國觀眾拜年。

张一智，牛犇，张昭

2008年1月26日，科工专（旅美中国科学家工程师专业人士协会）于伊州理工学院举办了一场关于在美职业发展机会的专题研讨会。会议期间，由来自摩托罗拉公司和普天寿金融集团的四位演讲者分别做了精彩的演讲，近两百名中国留学生积极参加了这次研讨会，他们分别来自大芝加哥地区五大高校以及康奈尔、普度等外州高校，其中绝大多数同学都在金融、计算机，工程等相关领域学习。

科工专主席陈奎博士做了开场演讲，科工专副主席阮永刚先生以及科工专理事会成员 Joanna 王女士共同主持了研讨会。此次研讨会由摩托罗拉公司和普天寿金融集团赞助。四位来自摩托罗拉公司和普天寿金融集团的专业人士跟同学们分享了他们对于职业发展，实习和工作机会的经验和建议。摩托罗拉公司的服务设计高级部经理 Dr. Ephraim Feig 做了题为“科学家和工程师职业发展提示”的演讲，并在期间和观众进行了深入地交流。Feig 问道：“面试的第一法则是什么？”，“怎么样平衡工作和生活的关系？”他还向热心参与回答问题的观众分发了纪念品。他的演讲让观众对于职业发展有了全新的认识。普天寿金融集团地区关系部经理 Robbin Burr 女士根据亲身经历谈了多样性策略和合作伙伴的相关内容。普天寿金融集团金融服务部经理 Arthur Agunloye 先生向大家介绍了普天寿金融集团金融服务部的职业信息，在场观众也表现出了浓厚的兴趣。摩托罗拉公司高校关系部经理 Graciela Tijerina 女士对摩托罗拉公司2008年暑期的实习职位做了综述，并分发了2008暑期实习职位的简介，观众也就此向她提了很多切实的问题。

演讲结束之后，四位演讲者亲自会见了学生们并继续回答了他们的问题。学生们也都表现出了热切的关注并就职业发展问题发表了自己的看法。最后，摩托罗拉公司和普天寿金融集团收集了94份学生投递的简历。

此次研讨会开阔了中国留学生对今后供职于美国公司的思路，提高了学生们在美国寻找工作机会的技巧，并且向广大学生谋求职业发展提供了良好的机会和平台。

Ask Your Rock for Retirement Income™

What is a variable annuity anyway?
It's a contract with an insurance company. You put money in to invest for retirement, and you can defer taxes every year until you withdraw the money. When you retire, you can turn your savings into a stream of regular payments that are guaranteed for life. This used to mean giving up control of your savings. Not anymore.

How does this benefit work?
You add the guaranteed withdrawal benefit to a Prudential annuity. Then, you allocate your money among professionally managed portfolios based on your needs. Prudential gives you lots of choices, including alternative asset classes such as commodities or real estate investment trusts, which add diversification that can help reduce the effects of market volatility. When you get to retirement, you can activate our guaranteed withdrawal option, which allows you to draw regular income for life—even if your account value should hit zero.

Am I protected if the market goes down?
Yes. Like any annuity, the account value is subject to market fluctuation, investment risk and possible loss of principal. But, should the market go down, Prudential guarantees your income base will achieve at least 7% annual compounded growth for the first 10 years, or until you begin taking withdrawals (if sooner). Also, during periods of market decline, Prudential may automatically move a portion of your assets from variable portfolios to the AST Investment Grade Bond Portfolio to help minimize risk to your account value. Money is moved back when the market rises. You should know that, depending on the timing of the transfer, this could affect your ability to participate immediately in market recoveries.

What if I want to access my account value?
You can do so at any time. Please note, however, that excess withdrawals will proportionately affect the amount of subsequent income. As with most annuities, surrender charges may apply. Withdrawals and distributions of taxable amounts are subject to ordinary income tax and, if made prior to age 59½, may be subject to an additional 10% federal income tax penalty. Withdrawals also reduce the annuity's death benefit and account value.

Who stands behind the guarantees?
Annuity guarantees are based on the claims-paying ability of the issuing company. That's why it's wise to choose one with proven financial strength. Prudential issues annuities through three U.S.-based companies: Pruco Life Insurance Company in New York, by Pruco Life Insurance Company of New Jersey, Newark, NJ; or by Prudential Annuities Life Assurance Corporation, Shelton, CT.

Is there a fee?
There is a fee for electing a guaranteed minimum withdrawal benefit. Also, variable annuities have fees, expenses and surrender charges, which you'll find in the prospectus.

This and other important information is contained in the prospectuses, which can be obtained from your financial professional. You should read them carefully before investing. Guarantees do not apply to the investment performance or safety of the underlying subaccounts in the variable annuity. Annuity contracts contain exclusions, limitations, reductions of benefits and terms for keeping them in force. Please consult your tax advisor for any tax issues. Each issuing company is solely responsible for its financial condition and contractual obligations.
